Int J Biomed Comput, 25 (1990) 297—299
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX

Volume 25 (1990)

ABVAB, expert system, medical diagnosis, vaginal bleeding, 223
Acceleration, fetal heart rate, deceleration, growth retardation, FHR variation, fetal movements, 287
Accelerations, antepartum fetal heart rate, automated analysis, computer, baseline, decelerations, 261
Accelerations, automated analysis, computer, decelerations, antepartum fetal heart rate, 273
Acid-base disorders, artificial intelligence, diagnosis computer-assisted, decision making computer-assisted, 177
Affinity, PASCAL, fluorescence, polarization, receptors, ligands, 125
Analysis of variance, information theory, mother-child relations, child development, data interpretation (statistical), 33
Anatomical images, pushbuttoning difficulties, drug evaluation, data analysis, 85
Antepartum fetal heart rate, accelerations, automated analysis, computer, decelerations, 273
Antepartum fetal heart rate, automated analysis, computer, baseline, accelerations, decelerations, 261
Antepartum fetal heart rate patterns, fetal movements, Doppler blood flow velocity wave form patterns, fetal blood gases, small-for-dates, 239
Artificial intelligence, acid-base disorders, diagnosis computer-assisted, decision making computer-assisted, 177
Auditory perception, speech intelligibility, hearing, signal processing, computer simulation, neural networks, 101
Automated analysis, accelerations, computer, decelerations, antepartum fetal heart rate, 273
Automated analysis, antepartum fetal heart rate, computer, baseline, accelerations, decelerations, 261
Baseline, antepartum fetal heart rate, automated analysis, computer, accelerations, decelerations, 261
Bubbles, gas phases, decompression, phase models, trigger points, gas kinetics, 193

Child development, information theory, mother-child relations, data interpretation (statistical), analysis of variance, 33
Cluster analysis, discriminant analysis, postoperative cardiac patients, 207
Computer, accelerations, automated analysis, decelerations, antepartum fetal heart rate, 273
Computer, antepartum fetal heart rate, automated analysis, baseline, accelerations, decelerations, 261
Computerized analysis, fetal heart rate, heart rate patterns recognition, fetal behavioural states, 247
Computers and AIDS, implantable defibrillators, neuromagnetism, squids, 1
Computer program, diabetes, pregnancy, telemetry, 91
Computer simulation, neural networks, learning algorithms, self organization, error back-propagation, 151
Computer simulation, speech intelligibility, hearing, auditory perception, signal processing, neural networks, 101

Data analysis, anatomical images, pushbuttoning difficulties, drug evaluation, 85
Data interpretation (statistical), information theory, mother-child relations, child development, analysis of variance, 33
DBMS, integrated HIS, 4GS languages, LAN, 137
Deceleration, fetal heart rate, acceleration, growth retardation, FHR variation, fetal movements, 287

Decelerations, accelerations, automated analysis, computer, antepartum fetal heart rate, 273
Decelerations, antepartum fetal heart rate, automated analysis, computer, baseline, accelerations, 261
Decision making computer-assisted, acid-base disorders, artificial intelligence, diagnosis computer-assisted, 177
Decompression, gas phases, bubbles, phase models, trigger points, gas kinetics, 193
Diabetes, computer program, pregnancy, telemetry, 91
Diagnosis computer-assisted, acid-base disorders, artificial intelligence, decision making computer-assisted, 177
^{99m}Tc-Diethyl-IDA, hepatic clearance, gamma camera, ^{99m}Tc-diethyl-iodo-IDA, 47
^{99m}Tc-Diethyl-iodo-IDA, hepatic clearance, gamma camera, ^{99m}Tc-diethyl-IDA, 47
Discriminant analysis, cluster analysis, postoperative cardiac patients, 207
Doppler blood flow velocity wave form patterns, antepartum fetal heart rate patterns, fetal movements, fetal blood gases, small-for-dates, 239
Drug evaluation, anatomical images, pushbuttoning difficulties, data analysis, 85

Enzyme kinetics, optimal discrete design, parameter estimation, model discrimination, 7
Error back-propagation, computer simulation, neural networks, learning algorithms, self organization, 151
Expert system, medical diagnosis, vaginal bleeding, ABVAB, 223

Features extraction, image processing, segmentation, labelling, 169
Fetal behavioural states, fetal heart rate, computerized analysis, heart rate patterns recognition, 247
Fetal blood gases, antepartum fetal heart rate patterns, fetal movements, Doppler blood flow velocity wave form patterns, small-for-dates, 239
Fetal heart rate, acceleration, deceleration, growth retardation, FHR variation, fetal movements, 287
Fetal heart rate, computerized analysis, heart rate patterns recognition, fetal behavioural states, 247
Fetal heart rate, fetal movements, ultradian rhythms, fetal regular mouthing, spectral analysis, real-time ultrasound, 253
Fetal movements, antepartum fetal heart rate patterns, Doppler blood flow velocity wave form patterns, fetal blood gases, small-for-dates, 239
Fetal movements, fetal heart rate, acceleration, deceleration, growth retardation, FHR variation, 287
Fetal movements, fetal heart rate, ultradian rhythms, fetal regular mouthing, spectral analysis, real-time ultrasound, 253
Fetal regular mouthing, fetal movements, fetal heart rate, ultradian rhythms, spectral analysis, real-time ultrasound, 253
FHR variation, fetal heart rate, acceleration, deceleration, growth retardation, fetal movements, 287
Fluorescence, PASCAL, polarization, receptors, ligands, affinity, 125
Forced oscillations, respiratory mechanics, signal optimization, 21

Gamma camera, hepatic clearance, ^{99m}Tc-diethyl-IDA, ^{99m}Tc-diethyl-iodo-IDA, 47
Gas kinetics, gas phases, decompression, bubbles, phase models, trigger points, 193
Gas phases, decompression, bubbles, phase models, trigger points, gas kinetics, 193
Growth retardation, fetal heart rate, acceleration, deceleration, FHR variation, fetal movements, 287
4GS languages, integrated HIS, DBMS, LAN, 137

Hearing, speech intelligibility, auditory perception, signal processing, computer simulation, neural networks, 101
Heart rate patterns recognition, fetal heart rate, computerized analysis, fetal behavioural states, 247
Hepatic clearance, gamma camera, ^{99m}Tc-diethyl-IDA, ^{99m}Tc-diethyl-iodo-IDA, 47

Image processing, features extraction, segmentation, labelling, 169
Implantable defibrillators, computers and AIDS, neuromagnetism, squids, 1
Information theory, mother-child relations, child development, data interpretation (statistical), analysis of variance, 33
Integrated HIS, DBMS, 4GS languages, LAN, 137

Labelling, image processing, features extraction, segmentation, 169
LAN, integrated HIS, DBMS, 4GS languages, 137
Learning algorithms, computer simulation, neural networks, self organization, error back-propagation, 151
Ligands, PASCAL, fluorescence, polarization, receptors, affinity, 125

Medical diagnosis, expert system, vaginal bleeding, ABVAB, 223
Model discrimination, enzyme kinetics, optimal discrete design, parameter estimation, 7
Mother-child relations, information theory, child development, data interpretation (statistical), analysis of variance, 33

Neural networks, computer simulation, learning algorithms, self organization, error back-propagation, 151
Neural networks, speech intelligibility, hearing, auditory perception, signal processing, computer simulation, 101
Neuromagnetism, computers and AIDS, implantable defibrillators, squids, 1

Optimal discrete design, enzyme kinetics, parameter estimation, model discrimination, 7

Parameter estimation, enzyme kinetics, optimal discrete design, model discrimination, 7
PASCAL, fluorescence, polarization, receptors, ligands, affinity, 125
Phase models, gas phases, decompression, bubbles, trigger points, gas kinetics, 193
Polarization, PASCAL, fluorescence, receptors, ligands, affinity, 125
Postoperative cardiac patients, cluster analysis, discriminant analysis, 207
Pregnancy, computer program, diabetes, telemetry, 91
Pushbuttoning difficulties, anatomical images, drug evaluation, data analysis, 85

Real-time ultrasound, fetal movements, fetal heart rate, ultradian rhythms, fetal regular mouthing, spectral analysis, 253
Receptors, PASCAL, fluorescence, polarization, ligands, affinity, 125
Respiratory mechanics, forced oscillations, signal optimization, 21

Segmentation, image processing, features extraction, labelling, 169
Self organization, computer simulation, neural networks, learning algorithms, error back-propagation, 151
Signal optimization, respiratory mechanics, forced oscillations, 21
Signal processing, speech intelligibility, hearing, auditory perception, computer simulation, neural networks, 101
Small-for-dates, antepartum fetal heart rate patterns, fetal movements, Doppler blood flow velocity wave form patterns, fetal blood gases, 239
Spectral analysis, fetal movements, fetal heart rate, ultradian rhythms, fetal regular mouthing, real-time ultrasound, 253
Speech intelligibility, hearing, auditory perception, signal processing, computer simulation, neural networks, 101
Squids, computers and AIDS, implantable defibrillators, neuromagnetism, 1

Telemetry, computer program, diabetes, pregnancy, 91
Trigger points, gas phases, decompression, bubbles, phase models, gas kinetics, 193

Ultradian rhythms, fetal movements, fetal heart rate, fetal regular mouthing, spectral analysis, real-time ultrasound, 253

Vaginal bleeding, expert system, medical diagnosis, ABVAB, 223
